

Water Service Request – Inside the Village of Trumansburg

To: Village of Trumansburg – Board of Trustees
From: _____
Address: _____

I am planning to build, construct, place, remodel, etc., and would like to have water service available on _____.

I understand that this application is restricted to one- and two-family residential units. A fee of \$250.00 is required at the time the application is submitted and is refundable if denied.

I understand that all costs of the installation of the service are to be borne by myself and that all work necessary from the main tap is my responsibility. (Note: the Village will tap the line, and set the curb box and meter, and if the installation involves cutting through a street, backfill and pavement replacement will be charged to the applicant.)

I agree to install the service to Village specifications and to maintain it from the curb box to the meter. I further agree to keep the meter protected from weather, and accessible for reading, and inspection.

I understand and will comply with the Village Water Ordinance.
